Exposure Control Parameters

Exposure Limits/Guidelines		
Chemical Name	Result	ACGIH/OSHA
Epoxy Resins	STELs	None Established
	TWAs	60 mg/m ³ ACGIH
	PEL	None Established

Appropriate Engineering Controls: It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (exhaust ducts,

dust collectors, vessels, and processing equipment) are designed to prevent the escape of dust into the work area. Normal ventilation is adequate. Ensure eyewash and safety showers are available.

Respiratory Protection: Not required under normal conditions of use.

Protection of Skin: Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Select glove material impermeable and resistant to the substance.

Eye Protection: Safety glasses with side shields or goggles.

General Hygienic Measures: Wash hands before breaks, and at the end of work. Wash hands and exposed skin with soap and plenty of water. Do not eat, drink, smoke, or use personal products when handling chemical substances. Avoid dispersal of dust in air. Do not clear dust on surfaces with compressed air. Avoid inhaling dust.
